

A

Diagram A shows a hand pressing the button labeled "OFF" on the control panel. The button is located in the center of the panel, between the "ON" and "STOP" buttons. The panel also features a "STOP" button on the left and a "START" button on the right. The "OFF" button is marked with a downward-pointing arrow.

Diagram B illustrates the assembly of the lamp body. It shows three steps: 1. Inserting the base into the bottom of the lamp body. 2. Attaching the four support legs to the bottom of the lamp body. 3. Attaching the top ring to the bottom of the lamp body.

F

The diagram shows a 16-pin connector with two rows of eight pins. A finger is pressing a button labeled 'ON' on the right side of the connector. An arrow points from the button to the word 'ON'.

C

The diagram illustrates the assembly of a three-tier wire basket. It shows three circular wire tiers and a central support structure. The assembly steps are numbered 1 through 4:

- Step 1: A small circular component (likely a cap or spacer) is shown being placed onto a vertical post of the central support structure.
- Step 2: A wire tier is shown being lowered into position, guided by the central support structure.
- Step 3: A second wire tier is shown being lowered into position, guided by the central support structure.
- Step 4: A final wire tier is shown being lowered into position, guided by the central support structure.
